Tue, Jul 2, 2019 at 10:44 AM

Dear Ms. Mclean,

We apologize for not getting back to you before.

Our service sheet records show 5 tags were put on the extinguishers with the date on them.

When extinguishers are checked – ABC Extinguishers are inspected for weight, gauge in green position, no powder in the discharge nozzle and tamper seal in place.

Carbon Dioxide Extinguishers are checked carefully against weight and ensure tamper seals in place plus no obstructions in the discharge nozzles.

Regards,

Steve Evans

Dear Mr Evans,

Your response to the following questions would be appreciated.

When extinguishers are serviced by your company, is there a date tag that is attached to each extinguisher?

Was there are date information on the three extinguishers that had been discharged?

You mentioned that extinguishers should be "checked" every four to six months; exactly what constitutes such a "check"?
